SUMMARY

Senior Product Designer with 10+ years on dense financial and enterprise products for expert users: wealth-advisor tools, a multi-asset trading application, middle-office payments, and a digital-asset proof of concept at UBS. Earlier work covered mobility, government, and automotive. I design for regulated environments, where users need to see what they are committing to and what changes when conditions shift. I run my own workshops and journey mapping and set up design systems when a project has none. I build my portfolio and side projects end to end with AI tools (Cursor, Claude, ChatGPT, Gemini, Figma agent). Results include 5–10 minutes saved per client on advisor information gathering, a platform used across 26 Swiss cantons, and 300% more solar leads.

EXPERIENCE

Senior Service Designer, UBS | Zurich, CH

Oct. 2022 – Sep. 2026

Product and service design across connected B2B platforms: wealth-advisor tools; a multi-asset application for bankers and traders (equity, bonds, structured products, funds); middle-office payments for bank-for-bank, wealth, and family-office clients in Switzerland and internationally; and a digital-asset proof of concept.

- Designed data-heavy flows so expert users could see status, exposure, and next actions without losing track across modules.
- Designed a proof of concept for a digital-asset feature, within the bank's constraints on trust and clarity.
- Aligned new patterns with the Design System team, contributed patterns back, and helped propose, review, and shape new AI components.
- Facilitated workshops and journey mapping with PMs, legal, and compliance.
- **Reduced advisor information gathering by 5–10 minutes per client** across CH and EMEA (wealth-advisor tools).

Senior Product Designer, AdNovum | Bern, CH

Oct. 2020 – Sep. 2022

Designed data-intensive enterprise applications for public-sector clients.

- Ran stakeholder workshops to align user needs, business goals, and technical constraints. Turned the findings into journeys and scopes engineering could build.
- **Enabled nationwide operational workflows across 26 Swiss cantons** with a centralized investigation platform.

Senior Product Designer, Futurice | Munich, DE

Jun. 2016 – Jul. 2020

Designed and launched enterprise digital products from concept to delivery.

- **Led a six-person team** that designed the new My BMW app and its design system for iOS and Android.
- **Redesigned the E.ON Solar calculator, bringing 300% more leads.**
- Mentored designers across regions.

Usability Engineer, Designaffairs (part of Accenture) | Munich, DE

Sep. 2014 – Jun. 2016

- Designed enterprise UX concepts, service blueprints, and interactive prototypes for connected IoT products.

PERSONAL PROJECTS

- On web and app side projects, I settle the visual direction first, build the design system before the screens, and maintain it with AI tools (Figma agent, Cursor, Claude).

SKILLS

Product: End-to-end product design · Interaction and visual design · Financial and regulated workflows · Risk-aware information design · Digital-asset feature design (proof of concept) · User research and workshops · Figma · Prototyping
Delivery: Design–engineering collaboration · Design systems (contributed at UBS; led the My BMW app design system at Futurice; built for side projects) · AI-assisted prototyping and build in personal projects (Cursor, Claude, Figma agent) · Mentoring (led a six-person team)

EDUCATION

Master, Media Design, Bauhaus-Universität Weimar, DE · 2011–2013
HCI Erasmus semester, Malmö University, SE · 2012–2013
Bachelor, Media Design, Tongji University, CN · 2006–2011
